

Seat programme LF

DAF LF trucks are built to deliver in urban and regional distribution. The driver must manoeuvre through dense areas and frequently get in and out, so the seat is designed to be safe, durable and ergonomic. Safety features such as integrated head restraints and three-point seatbelts not only conform to legal requirements, but also contribute to comfort and convenience.

Optimal adjustability

The DAF LF seats are optimally adjustable and thus easily accommodate drivers of all sizes. One can always find the most comfortable driving position.

Dual mate seat

The LF series Day Cab and extended Day Cab can be specified with a fixed dual mate seat. The dual mate seat of the extended Day Cab has a lap belt on the inner seat position and a 3-point seat belt on the outer seat position; the Day Cab is always specified with 3-point seat belt.

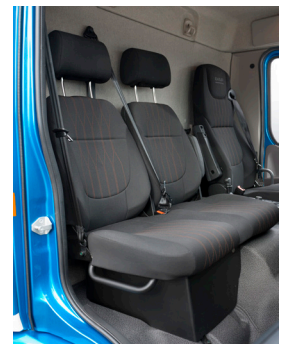

Two different executions are available:

Standard dual mate seat, for Day Cab only

- velour or (optional) vinyl upholstery
- storage space under outer seat by tilting cushion

Luxury dual mate seat, for Day Cab and extended Day Cab

- velour upholstery
- head restraints
- armrest on the innerseat position
- foldable inner backrest to be used as a table
- lockable storage space under the gas strut assisted, tilted outer seat cushion.
